Gender budgeting

Step 2: Evaluation and expenditure verification (ex-post)

This step repeats Step 1, but introduces an additional assessment at the project level by applying the weight system to each funded project. Based on this general refinement of the tracking system, it is possible to compare the ex-ante intervention assessment with the results of an on-going project assessment during the programme's implementation. This means conducting a deeper analysis of the three tracking categories presented as relevant or potentially relevant for gender equality.
